

Fuel Synthesis

Now that X has collected all 10 ingredients in the recipe, it's time to synthesize the rocket fuel needed to return home!

Preparation

The ingredients have gotten jumbled up in the process, but luckily X remembers what holidays they collected them on.

4. Keep the final two letters and surround it with an abbreviated Facetime.
8. Take the abbreviated medical device in this ingredient and concatenate it with the US state abbreviation in this ingredient.
10. Keep only the first three letters, but have the first letter follow Caesar back one step. Prepend with the letter O.
12. Make it French without an article.
16. Discard southeast.
18. Take the prefix, which corresponds to an abbreviated ability name in Dungeons and Dragons, and append the final letter of this ingredient to it.
20. Keep only the second letter of the color, remove the snake, and shift the remaining four letters to the left on a QWERTY keyboard.
22. Extract the tall twins from this ingredient.
23. Take the code of the largest airport in this ingredient.
25. Discard everything except the first three letters.

Synthesis

Now that all the ingredients are prepared, combine them to make fuel!
